TWO AIRFRAME CONFIGURATIONS, NOT PREVIOUSLY SEEN ON PHOTOGRAPHY, HAVE BEEN OBSERVED AT THE BALAKLAVA CRUISE MISSILE SUPPORT FACILITY (44-30N 33-32E), LOCATED ONE NAUTICAL MILE WEST OF THE CRUISE MISSILE LAUNCH PADS. BOTH CONFIGURATIONS, A DELTA-WING AND A SWEEP-WING, PROBABLY CRUISE MISSILES AND THEIR PRESENCE SUGGESTS THAT THIS FACILITY IS ENGAGED IN R&D WORK.

DELTA-WING AND THREE SWEEP-WING PROBABLE CRUISE MISSILES WERE SEEN AT THE FACILITY FOR THE FIRST TIME. ONE OF THE THREE SWEEP-WING MISSILES APPEARED TO BE MOUNTED ON A POSSIBLE LAUNCHER APPROXIMATELY 15 FEET IN ADDITION, TWO SAMLETS AND A CANVAS-COVERED SAMLET TRANSPORTER WERE PRESENT AND A TOWER-MOUNTED RADAR ON A TRUCK AND NUMEROUS MISCELLANEOUS VEHICLES/VANS WERE OBSERVED SCATTERED THROUGHOUT THE FACILITY.

THE DELTA-WING CONFIGURATION HAS A SPAN OF APPROXIMATELY 15 FEET AND A NARROW FUSELAGE APPROXIMATELY 4 FEET. THE SWEEP-WING CONFIGURATION IS SIMILAR TO THAT OF THE SAMLET, BUT WITH A SPAN OF APPROXIMATELY NINE FEET AND OVERALL LENGTH OF APPROXIMATELY 15 FEET.

THESE PROBABLE CRUISE MISSILES CANNOT BE NEGATED SINCE THERE IS ONLY SMALL-SCALE PHOTOGRAPHY OF THE FACILITY PRIOR TO THE FACILITY HOWEVER, THE FACILITY WAS FIRST SEEN UNDER CONSTRUCTION IN [REDACTED] AND CAN BE NEGATED IN [REDACTED]

[REDACTED], ONLY THE TWO SAMLETS AND ONE SWEEP-WING MISSILE AND ITS ASSOCIATED PROBABLE LAUNCHER WERE PRESENT
